

## CLAIMS

1. A blank construction of an insulator construction which comprises:
  - a substrate layer adhered to a heat insulation layer to form an insulating layer,
  - said insulating layer having a central rectangular or square portion,
  - a plurality of side sections, each of said side sections being attached to only one side of said central rectangular or square portion,
  - two of said side sections being positioned in opposing positions to each other having two wing sections attached thereto,
  - and means for securing said wing sections to a side section positioned adjacent to each of said wing sections.
2. The blank construction of claim 1 wherein said securing means comprises mating hooks and loops.
3. The blank construction of claim 1 which includes an exposed heat reflective layer secured to said insulating layer.
4. An insulating construction comprising the blank construction of any one of Claims 1, 2 or 3 folded in a three dimensional configuration wherein each of said wing sections is attached to an adjacent side section and
  - a rod constructing having a first set of horizontal rods and a second set of horizontal rods joined by a set of vertical rods that extend through said folded blank construction at two points.
